ABOUT US

When the production and capacity were important a couple of years ago, values take an absolute important place today the take place between the values which must be absolute today. Globalization, institutionalization, fertility environmentalism and satisfaction of the customer emerges in the first area.

Developing technologies are a part of companies which are not easy to give up. Expectations of a production directions which concerns humankind take place in the centre of functionality, esthetic and design triangle. Efforts of people who build the institutions are to bring up quality productions which are worth to buy them the high technologies.

Our journey started and full of expectations in the 1970s determined and hopeful in 1970s with this understanding and enrepreneur spirit and maintains 100% native products in the fields of agricultural strife, agriculture and stock-breeding (cattle-dealing) by remaining loyal to principles and visions.
